

# ANGEL ORNAMENT

**Supplies Needed:** cupcake liners, glue, tape, glitter glue, twine, beads  
(optional: q-tips or small paintbrush)

- Pick three cupcake liners (two wings and a body) and a bead for the head
- Flatten all three cupcake liners
- For the wings, fold the liners in half, in half again, and in half a third time (glue at each stage to lay flat)
- For the body, fold the liner in half and in half a second time (glue at each stage to lay flat)

- Glue the wings on the back of the body (overlapping one over the other)
- Add glitter glue if desired (we suggest putting some glitter on a paper plate and use a q-tip, paintbrush or finger to brush glitter on the wings and body)
- Loop the twine and tape both ends to the back of the angel body
- Thread the bead through the loop and push down to the top of the body
- Let the glitter glue dry before hanging up
- Mom tip: add the creator's name and the year to the back
